

Timber Product Output and Use Tennessee, 2017

Tennessee forests accounted for a total of 272,157 thousand cubic feet (MCF) of timber products while the forest products industry produced a total of 339,793 MCF within the State.

This resource update contains the findings of a canvass of all primary wood-using plants in Tennessee. It complements the Forest Inventory and Analysis (FIA) annual inventory of volume and removals. The canvass was conducted to determine the amount and source of wood receipts and annual timber product imports/exports. Only primary wood-using mills were canvassed. Primary mills are those that process roundwood in log or bolt form or as chipped roundwood. Examples of industrial roundwood products are saw logs, pulpwood, veneer logs, poles, and logs used for composite board products. Mills producing products from residues generated at primary and secondary processors were not canvassed. Data used in this update were accessed from the FIA Timber Product Output database (see back page).

- Hardwood/Softwood
- Softwood

Tennessee had a total production of 272,157 MCF in 2017.

There are about 261 primary wood processing mills accounting for production in the State.

Statewide roundwood production (% of total) by product

Saw logs	57.41%	■
Pulpwood	32.38%	■
Bioenergy/Fuelwood	9.67%	■
Miscellaneous	0.54%	■

Tennessee imported 110,281 MCF into the State and exported 42,646 MCF out of the State making them a net importer of roundwood.

Total roundwood production over time

■ Hardwood ■ Softwood

Timber Product Output

The National Timber Product Output (TPO) section of the FIA program collects and reports estimates of industrial and nonindustrial uses of roundwood. Details of the TPO section and TPO data can be found here: <https://www.fia.fs.fed.us/program-features/tpo/>
