Subject: Southern Forest Resource Assessment comments

Mr. John Greis

Dear Mr. John Greis,

I am writing to urge you to include a fuller analysis of ecological and socio-economic sustainability in the Southern Forest Resource Assessment (SFRA), and to lessen the expansion of industrial forestry, which threatens the other uses our forests will desperately need to serve in the future.

Industrial forestry can take place on private lands. Our national forests are needed for recreation, wildlife habitat, wetlands habitat, etc.

Thanks very much for your attention to this important matter.

Sincerely,

Betty Lawrence
